# Full Blood Poland China Hogs

We are breeders of full blood Poland China Hogs of the large bone and rangy type, and have for sale at this time a few very choice boars. We offer young hogs, 10 months old, weight 300 to 350 lbs., in breeding condition, while they last, at \$40 each, crated f. o. b. Owatonna. A certificate of registration furnished with each animal. Our Poland China Hogs are descendants from the most famous strains in the country, viz. Sired by Mammoth Chief No. 184,421; he sired by Lyon Chief No. 156,191; Dam, Winning Queen No. 345,278; Breeder, E. S. Barker of Doon, Iowa. The Dam of these boars, Lillie Prince No. 425,360 sired by Thyne's Chief Prince No. 155,667, from Lillie Prince No. 360,932: Breeder, J. J. Thyne, Doon, Iowa. We consider these animals, as individuals, the best in the country, and the hog raiser who places one of them at the head of his herd will be very fortunate. The sire of these boars cost us \$100 when a small pig, and was a first prize winner at the Minnesota State Fair in 1910. The dam is from J. J. Thyne's famous herd of prize winners. These hogs have all been vaccinated and are immune from hog cholera.

Write us for further particulars.
